

Autumn... the years last,
loveliest smile

THE BENEFITS OF CENTRAL SECURITY SYSTEMS VS NATIONAL HOME SECURITY PROVIDERS

As a consumer, you've probably noticed (and maybe even taken part in) the growing movement that urges people to do business with local companies rather than large national chains; whether it's shopping local or eating local. But what about selecting a local provider for your home security needs?

Supporting local, supports the community.

By choosing a local family business, like Central Security Systems, you are supporting a business that is providing jobs in your community and putting money back into the local economy. Not only do we contribute to the community by hiring local people, we sponsor community events including Movie in the Pines and Southern Pines Tree Lighting, Parades, & Springfest. This type of involvement helps to build strong, trusting communities.

Home security tailored to YOUR home.

We have a bit more flexibility when it comes to our package offerings than some national providers do. We understand that every home is different and every homeowner expects a different level of security. We want to

provide a customized package that is the right fit for your home.

Neighbors looking out for neighbors.

Our office is located right in the heart of the communities that we serve; not across the country or the world. This proximity means that we can build better relationships with local law enforcement and emergency services. It's also nationally award winning! Our Monitoring Center carries certifications and distinctions many others do not.

Since we are staffed by your neighbors, we have more of an insight into the security needs and concerns of our community than a company located hundreds or thousands of miles away would. We know the types of security solutions that are the best fit for North Carolina homes and businesses.

Since Central Security Systems is a smaller company than our national competitors, we can provide a more personal customer service experience. To us you aren't a faceless customer, but a neighbor that we are committed to helping.

Fall 2017

WHAT'S NEW

The new Alarm.com Customer Website is going live on October 30, 2017

Check It Out Now!

Log in to Alarm.com using Login: **emberdemo** with Password: **Demo123** to see what's changing. Click on the "?" in the top right corner of the screen to launch a website tour.

Fall Security Tips

It's Fall. The leaves are changing color and the weather's getting colder. Kids are busy with school and the holidays are quickly approaching. Fall is associated with great things, but it's important to not let your guard down during this time of year in regards to protecting your home and family.

Lighten the Darkness:

Be sure your house and property are well-lit and your house appears occupied at all times. Provide ample lighting around entryways and walkways. Be sure your security lighting is working properly.

Deter potential burglars by setting timers on indoor lights; Make sure you reset your timers to coincide with the shorter hours of daylight

Make access to the back of your home hard to get into to.

Lock all side gates with a secured lock and not a simple lock. Keep your garden shed locked (burglars love tools to use for a break in) and most importantly the garage door (all doors entering or exiting the home and surrounding garage areas).

Secure Your Home

Fall is a great time of year weather-wise. During fall lots of families spend time outside. It could be throwing the football around or going on a bike ride. Whatever you're doing outside, if you are not home make sure your doors are locked. A locked door is the best way to prevent someone from entering your home. And when away always have your home alarm activated. Lock all windows including bathroom and kitchen windows. Make sure you lock windows after closing them as many people tend to forget. These three things will

instantly improve your level of protection

Don't answer the door for strangers.

If you are not expecting any company, do not answer the door. Many burglaries happen when an intruder has easy access inside a residence. We suggest installing an optical peep-hole, a video peep-hole or a video intercom system.

Test your heat before it gets too cold to make sure it works.

If it needs servicing, schedule something before the cold hits. If you have a fireplace or wood-burning stove in your home, check to make sure it is clean and in proper working order for the winter months ahead. Now may also be a good time to stock up on firewood.

Batteries

Change batteries in smoke alarms and CO detectors when you change your clocks.

We often forget to check and change these batteries, so coinciding it with an annual event, like daylight savings, will help you remember. This may also be a good time to check and replace any used or expired fire extinguishers.

Play it safe with Halloween

Whether or not you will be home to pass out treats, keep your home alarm armed throughout the day and night. Think about it from a burglar's perspective: You are able to canvas an entire neighborhood without arousing any suspicion, because of all the commotion of the holiday. It's like a burglar's dream!

Also, keep doors and windows locked and home security yard signs clearly displayed and well-lit in order to steer away any nighttime criminals.

2016 CSAA CENTRAL STATION OF THE YEAR

Since 1992, **Rapid Response** has been committed to having the most qualified, extensively trained personnel and the most advanced technologies available with the singular purpose of providing customers with the very best monitoring services.

MIND-BLOWING WIFI

PROVIDED BY

Luxul 1032 Wireless Access Point (WAP)

What Sets Us Apart

For Sandhills Home Theater, providing our customers with a reliable, high quality network is top priority. The most challenging part of a "connected home" is the network itself. We ask ourselves a few questions to make sure your WiFi is the best it can be:

- ❖ Is it possible to maintain a clear wireless IP telephone connection moving to any location in the home?
- ❖ Do wireless devices maintain strong signal strength and constant data rates no matter where you are?
- ❖ Do mobile and handheld devices work properly in every corner of the home without interruption? How about while moving?

Maintaining a clear and consistent wireless network can be a challenge. This is why we offer reliable products that strengthen signals and give you the *Mind-Blowing* experience that you were looking for!

A. Standard WiFi with one WAP.

A: MAIN FLOOR

The floor plans to the left use a standard WiFi access point. The image below demonstrates the difference in strength and quality with a Luxul WAP. Blues / greens are the strongest signals and reds / oranges are areas where there is little to no coverage.

B: MAIN FLOOR

B. Our WiFi with one WAP!

The difference is clear!

The Premier Award-Winning Remote Network Monitoring and Management Platform

Remote Network Monitoring

24/7 network and device monitoring software with device checks every 30 seconds. Supports multi subnet & VLANs, SNMP and ZigBee.

Remote Power Management

Remote power management, device reboot, PoE and Auto and on Demand Wake-on-LAN. Supports network switches and PDU's.

Flexible Remote Access

Remote access to web, console and remote desktop devices. Supports remote access using http/s, RDP, SSH or Telnet connections.

Automated Network Mapping

Automated discovery of devices connected to a managed network switch. Supports SNMP and PoE to monitor the data traffic and manage power of individual ports.

Network Diagnostics

Speed tests, internet health checks, network history log and Ethernet port monitoring.

Network & Device Alerts

Email and push notification alerts for network status, device offline and when a new device is found (intruder alerts). Unlimited alerts at no extra charge!

musicCast

The Musiccast app puts control of your Whole home listening experience in the palm of your hand
